Your kicktipp rank: **13th of 20 active** — **44 pts** (incl. 8 bonus points, which the model/expert don't play; the head-to-head above counts game tips only, so You = 36). MD5 had no tips logged for you at all — that's the single biggest gap vs. the model/expert. Two takeaways for MD6: (1) tip **every** game — untipped games are the costliest, and (2) for the tight matches, a cautious 1-0 scores more reliably than a 2-1. Suggested tips are on each MD6 card below. 🎯
